Good folk who would like to see society affered without shocks must make up their minds to surrender all such hopes. It is impossible to entertain them. A social order that is founded upon force and murder, and maintained by guns and bayonets, will not be overthrown by philosophy, nor will it yield to a political majority. Poverty and discontent arising from our bad social organization must lead directly to revolt as soon as the producers find out the part they play in the creation of wealth. Unrest and revolt are on the increase; the ideal of justice, equality and solidarity is being visioned with ever-growing clearness; and we are evolving towards a condition which is not only beautiful and desirable, but is an imperative necessity.
