What will be the next move? To be able to answer that question correctly we would pay a large sum of money, if we had it. We only know what all the world knows; viz., that Ambassador Wilson has been hurriedly recalled from Mexico City, for a consultation at Washington, and that the dailies print in huge capitals: has a right to life and happiness. And being a bold and open enemy; one "Germans demand United States protection."

Naturally the dailies are running out column after column on the subject, the general statement being that Germany has \$4,000,000,000 (surely an exaggeration) invested in Mexico; I know only the law. I recognize such a series of letters as that which about it? What are they but a proof that these millions demand protection; that she calls on the United States cither to live up to the Monroe doctrine and act as an effective policeman for the whole of North Ame-

Three courses are now open to the doctrine; the second, to acknowledge operate with it in putting down the armed invasion.

What does all this actually mean? In another column we quote extensively from Carpenter's closing series of articles to the "Los Angeles Times," in which, summing up the situation, he insists that the trouble ' in Mexico is economic, that the people are tired of allowing the country to be owned by the few and that out of all this trouble a complete social reorganization may come. But how is that reorganization, admitted as theoretically desirable, to come if the Money Power, in one way or another -and which way is merely a question of detail—is to be allowed to protect good and virtuously legal to the orditerms of governments and accepts the common doctrine that all property protected by the government, as representing the masses-what irony!the moment it has succeeded in get-

It is not so. It is a huge economic England and Germany?" No discus- @ made to them, in the way of restoring their lands, @ lie, and, therefore, a gigantic crime, because what dision of human rights; only an anx- O by the powers which plundered them, there will be O vides and paralyses the revolutionary movement is mudhas been the occasion of an ovation ious unspeakably abject solicitude as o no peace in Mexico."

Do you know, gentle reader, from whom we are education of the race by showing it, quoting? No less an authority than the "Appeal to Reason," the great champion of the proletariat which wrote, May 27, 1911, an editorial that began: "The Mexican revolution is at an end," and continued with what we ourselves branded as the "bombastic and lying statesure to note that in the declaration editor of this section is advertised as in politics, District Attorney Freder. At this very moment the leading ment" that "thus ends a remarkable historical event that was practically inaugurated by the 'Appeal to Reason'." We ourselves care nothing about yesterdays. We are saturated with the philosophy that "while the lamp holds out to burn the vilest sinner may return." We should welcome the death-bed conversion of the "Appeal to Reason," but unfortunately THAT LYING SHEET IS LYING STILL. It is lying in a way most injurious to us; it is lying in a way most fatal to the great revolutionary movement of the world. There can be no misgreat break for liberty which is about, influence Ricardo Magon's writings ance abroad." Fredericks is a Con- delay they will be permitted to work take, about that, and alleged revolutionists-whatever to come, and they are worth a cen- have exercised is due unquestionably servative of the old, stalwart type, and and exploit the national lands and they may call themselves—should take the trouble to put on their thinking-caps and understand the lie.

We are showing that the Mexican Revolution is idenourselves up by our hoot straps or is the just as surely to the fact that ers who, facing both ways, advance and thus certain needs will be relieved tical with the struggle of the disinherited throughout the dreaming that we can smash slavery his written thought has received the nowhere, and sifting on two stools, and the aspirations of a great part of world that to rob man of his access to natural coppor tunities is to doom him to wage-slavery of the most Observe that it is always the land hopeless type; to crowd him into cities whose pavements

grow no bread; to deliver him, bound hand and foot, to the remorseless cruelty of the Money Power, backed by the Servile State. Our whole argument is that the condition is universal, and that the Mexicans are entitled to

Always the "Appeal to Reason" has done its very utmost to alienate that universal sympathy, and done it in its habitually Jesuitical style. It has done it by representing conditions in Mexico as PECULIAR to that country; by representing Mexico as still in the feudal stage, whereas in reality she is the victim of entirely up-to-date capital, of absentee profict and usuary-mongers, operating

It should be easy to grasp the point we make. It should be easy to understand that the "Appeal to Reason's" misrepresentation has precisely the effect it is 4 dy thought, deliberately created by those with private ax to grind. It has no sympathy with us because we do not believe in the ballot, of which not one Mexican in a hundred knows anything; because we say-and this is absolutely fundamental for the entire revolutionary movement-that before you can talk of ascertaining the free opinion of any people you must set them economically

The "Appeal to Reason"-however smoothly or radically it may talk, under the pressure of events, todayis utterly antagonistic to us, and is an enemy the more dangerous because it is hiding in the long grass instead of coming out into the open. It is antagonistic because it is personally interested in upholding to the end of time the great Socialist delusion which puts the cart before the horse and teaches that you can get a free expression of opinion at the ballot box from a people econumically enslaved.

No greater delusion than this was ever foisted on the ignorant. No fouler crime was ever committed than the dissentination of that delusion by the so-called "Intellectuals," who know it to be a delusion and sefishly conceal the truth. Such crimes have to be bolstered up by endless lies, and of that pernicious art the "Appeal to Reason! is a past master who has taken the hundred and fifty-fifth degree,
