#### Letters from Germany Reveal Truth on Conditions in Labor Ranks

The letters published below and hailing directly from different parts of terror-stricken, Fascist Germany, paint, in many instances, a black picture of the conditions of the working class and its revolutionary vanguard. This is a bitter pill for revolutionists to swallow, particularly those who have been fed on Stalinist pollyanna illusions. But it is our policy to speak out what is, to tell the truth to the working class and especially the Communists. It is precisely these illusions and these falsely painted pictures, at which the Stalinist apparatus has been so adept, that led the German proletariat to catastrophe.

We quote a short report from No. 10 of the Inprecorr, ("Rundschau") to indicate how even after the catastrophe the bureaucrats continue their work of deception and falsehood.

"Many small section groups in practically all of agrarian Pomerania have been arrested down to the last man; despite that, the work will be carried

will continue the work." (?) No, our letters don't read that way. Much that is in them sounds harsh, but only upon the truth will we build our future strength.
