Still, it should have found a place on the table of every diplomat or journatist who occupies himself with the present-day foreign policy of Germany. Let us recan the circumstances of the polemic. Papen was then Chancellor. Hitler was in expectant opposition-between August 13, When Hindenburg refused to appoint him head of the government, and January 30, when the Field Marshail was forced to yield the command of Germany to Hitler. 'The "Open Letter" was not destined for the masses, but for the ruling classes, and had as its aim to prove the National-Socialists have a serious program in foreign policy; finally, that he, Hitler, is as far reis from adventurism. The question which interests us can be posed in this way: Does the demand for disarmament correspond to the revolutionary direction among the Swiss social-democrats, or not? Obviously this is not the case. Objectively speaking, the "demand" for disarmament corresponds to the opportunistic, narrowly-national, line of the labor movement, limited by the horizon of a small state. Objectively speaking, "disarmament" is the most national, the specifically national, program of the small states, and in no way an international program of international social-democracy.
