### MARCH OF EVENTS

By JACK WEBER

The Road to Power . . .

In the current issue of the New Leader appears an article by the Menshevik, Abramowitsch, on "Socialism on the Road to Power." Here reformist socialism once more lifts its head and tries to create the impression that it may revive and come to life. Two currents in the rapidly moving world scene create the illusion among those like Abramowitsch, cast on the rubbish heap of history, that it is yet possible for them to come into their then this social chauvinist adds, in own. The first is the assumption of office in the so-called "democratic" countries by labor parties. Thus "labor" governments have come into power in the three Scandinavian countries; the labor party en- the reformists guarantee their next ters the national concentration government in Belgium; and finally in tional defense to uphold the capi England events foreshadow a new Labor Party government. True, says Abramowitsch, the governments do not have a majority in parliament and hence "do not place before themselves the task of immediate realization of Socialism." trend of the Stalinist bureaucracy Their immediate task is to supply in the Soviet Union. The complete "power"; that is, take over responsibility for the bourgeois government and the bourgeois, not the Socialist, system of society!

#### The Betrayals . . .

Abramowitsch knows quite well avian countries as against Ger-Socialism by the victory of Hitler. But he dare not stop to analyze the lessons of that blow, nor to apporworkers organized in the strongest Social Democratic party in the world. He is consoled by the misism to its very foundation, emphatalist system, feel compensated this very misery! And when the Abramowitsches see signs of a repower, and on a platform of re or the Third, but of the Fourth In- for. When the Labor Party voted formism and coalition with demo

cratic-bourgeois parties." In short, he approves of the very process which creates illusions among the workers, which lulls them into passivity and disarms them at the very moment when fascism is making its bid for power (and not with votes!) in every country in Europe. The approaching imperialist war threatens the workers and all their democratic rights, gained through years of struggle and at untold sacrifice. Abramowitsch gives lip service to the fact that only the forces of Socialism can prevent war. And preparation for the actuality: "And only the working class, as the basic power upon which modern industry rests, can help win a war should it be impossible to avert it. Thus do betrayal in advance, guarantee natalist system.

The second current that gives

courage to the Mensheviks is the

to be examined.

How does it happen that Stockholm Bureau, founded for the purpose of aiding the movement International, could nevertheless send as its spokesman to Paris one

constitution of the Secretariat.  $S.\,Y.L.\,Flays\,YouthBuroRep.$ We here are under the impression

hat back of the Paris incident lies a completely false relationship of forces in the secretariat; a combination of S.A.P. and Swedish youth leaders against the so-called "Trotskyites" who are faithful proponents of the Fourth International. We could have little to say if this representation reflected accurately the relationship of forces of the youth organizations constituting our Bureau. But that is far from the case. When we consider the real youth forces at the present time we think at once, in addition to those already represented on the bureau, of the youth section of the newly formed Dutch party (out of the fusion of the O.S.P. with the R.S.P.); of the French youth forming a part of the Bolshevik-Leninist fraction in the S.F.I.O. which exerts wide influence in the Federation of the Seine; of the Belgian Youth with deep roots in the J.G. S. Nor do we fail to add to these our own organization (the Spartacus Youth League of America) whose influence and strength continues to grow daily as indicated by the success of our numerous projects and by the fact that the membership of the organization has been far more than doubled in the past

three months. It is our decided opinion that the Bureau, if it is to mean anything, if it is to continue to serve as an apparatus for the Fourth International, must be immediately reorganized to take account of these influential sections. Accordingly we demand the immediate addition of two members to the secretariat; namely, a representative from the Dutch organization and one from the French. The new secretariat able. # Bolshevik-Leninists in U.S.S.R. Face New Frame-Up

By L. TROTSKY

On January 18, 1935, I wrote on referring to the Trotskyists and the the question of the Zinoviev affair: nobles who "acted in concert," uses "It would be criminal lightmindedness to think that Stalin has renounced his attempts to frame us up in some new "affair" cooked up bureaus." Thus, in the span of by the G.P.U. or its foreign agents. five days, these miserable falsifiers Stalin has no other method of struggle against us."

To be sure, the threat of such a new amalgam is hanging over the is not the last. heads of our friends in the U.S.S.R. Its preparation is filthy and abominable. But that indeed does not hinder it from opening the road to bloody repressions against the Bolsheviks and their relations.

On March 20, Pravda published reports on the expulsion from Leneven in the budget commission. The "Part of the exiled are indicted . . . is direct evidence that in five days for activity against the State in it was decided to prepare new the interest of foreign nations," We completely omit here the positionists and since there was no

question of how, 18 years after convenient terrorist act at hand, October, there could be found in Pravda was instructed to link this Leningrad more than one thousand newest extermination of Bolsheviks Just to show that we haven't lost dangerous representatives of old to the measures taken against the our sense of humor, we want to Czarist Russia. Does this mean old proprietors, nobles and police quote from the editorial in the Arand exterminating the Leninists, had not noticed the class enemies? "The royal stipend was estab-Or does it mean that the thousand lished by contract before he (the mentioned above did not previously king) came here. He wanted to be represent any danger and had assured of a regular salary which raised their heads only now after the Stalinist regime has led to terrorist acts inside the party and to for a smaller salary on previous bloody mass repressions against the party youth. In either case, the official information leaves no doubt as to the personalities against whom the Leningrad purging was directed: all the 1,074 individuals belonged unmistakably to strata of the former ruling classes and the Cza.ist bureaucracy.

But five days later, in Pravda of March 25, we already find a new version; on the question of the arrests and deportations, it says the following, word for word:

"The foul dregs of the Trotskyists, the Zinovievists, the old princes, counts, gendarmes, all this refuse, which acted in concert in an attempt to undermine the foundations of our state."

Thus, among the 1.074 people exiled and indicted, and at their concert" with the former ministers why then were the group of Trotomitted from the official report of March 20, which gave a precise enumeration of all those expelled and indicted? It is absolutely clear: cial information several days later: the former police agents, they aver, acted in concert with the Trotsky- area. ists and Zinovievists, which they had forgotten, God knows why, five days earlier.

Besides this unexpected "correction," they carry another not unimportant qualification, concerning the scope of the crime. The March 20 report says that the nobles and the police officers acted in the "interest (?) of foreign nations." The vagueness of this formula is selfpermitted to select its own residence working class and its need for the

## Question Box

= By A. WEAVER=

F. H., NEW CASTLE-Question: Is not the economy of fascism, as well as that of the Soviet Union, planned, i.e., are not the capitalists, forced to surrender their wealth to the government which operates it for all society, so that the economy is neither capitalist nor socialist? . Does not the "New Deal," in tendding towards this, lead to a planned economy?

Answer: Capitalist production is commodity production, i.e., the production of things for exchange (or sale), and so long as capitalism exminority whose policy undoubtedly workers, the confiscation of the ists, so must the latter. The essence cent of the Norwegian people-the a radically graduated property and petition and the creation of goods for an unknown market If comseamen, the fishermen. In the fall small farmers from their mortgage petition did not exist between buyof the past year the Norwegian and debt burdens, the organization ers and sellers, one with the other, there would be no way of arriving at prices, and the whole basis for capitalism would collapse.

A planned economy, however, can union section, such a "Workers, be conceived only if competition between the producers is eliminated and production organized by ment measures. After that, these a central management, which measures could be laid before the knows the ultimate destination of Storting. Should they meet with all goods produced and has the rejection by this body, the Storting power of controlling the amount could be dissolved with the full of products to be made and the manner in which they are to be if the king opposed this policy-as distributed. This, however would most likely he would-the govern- no longer be capitalism. It is true ment could confidently proceed to that monopoly does away, at least depose the king. The responsibility partly, with competition within for the use of arms could be placed | certain industries, but this only agsquarely upon the shoulders of the gravates it by raising the struggle opposition. Internationally, the dif- between small industries to a contest between giants.

Under capitalism, therefore, and this applies to the "New Deal," planned economy is impossible so that the touchstone to the problem is this: In order to plan economy. capitalism must be abolished.

As even a superficial examination shows, fascism does not stand between capitalist and socialist society, but IS capitalist society, so that a planned economy is excluded. The stock market remains, wage labor remains; the banks, factories, etc. all are in the hands of financecapital, as in bourgeois-democratic society. What appears here as "planning" consists in the fact that the state power, which, in class society, is always the agent of the class which owns the means of premight be used against it, particularly those of the working class (trade unions, political parcies, etc.), but also directly suppresses those smaller capitalist competitors who are ruined under bourgeois democracy by more indirect methods, (e.g., lower prices, depriving of credits, raw materials, etc.). On the surface, therefore, it may appear that the capitalists are also being regulated and as though the government is being operated in the interests of "society," whereas the suppression is, in reality, carried out in the interests of a numerically small financial oligarchy which manages to keep its existence and identity successfully in the back-

The only social form, standing between capitalism and socialism, is the dictatorship of the proletariat. the form of state power in the Soviet Union, and only in that country is planned economy, made realis able by the expropriation of the capitalists and landlords, possible. This statement must be qualified because a COMPLETELY planned economy can be achieved only in a SOCIALIST society. The political conditions exist in the Soviet Union for organizing production along Socialist lines, but the economy of that country and the world are inseparably linked, so that the planning, subject to the unknown fluctuations and crises of the capitalist world, is necessarily limited. Humanity will know a completely planned economy, free of unknown social upsets only if and when the international Socialist society will become a historical fact.
