

TUUL. It would be very desirable that the TUUL should write a letter to the Union. If you could make a little appeal to the fishermen it would also be very good. The Secretariat of the Caribbeans must also put out an appeal to the Fishermen of the States of Mexico and Central America and call upon them to show solidarity. The Union must be informed directly of these steps. I should have sent you these facts earlier. Do not think that it is so easy to get anything here. The whole thing is in my hands. I have conferences with the leadership almost every day. I know that this is very uncautious and yet I have been waiting for more than 8 days for some sort of more exact information and finally had to merely assemble what verbal information I have received. With regard to further events I will keep you continually informed.

On Unemployment.
