

leaves the Party! That was the general secretary of the Party! I

Two students (who do not want to do any work among the students) and one worker became convinced that an Anti-Imperialist League must be founded. They don't say a word to anybody, write an appeal that an Anti-Imperialist League was founded, that the Anti-Imperialist League is the avant-garde of the proletariat, that it will fight for the seven hour day, that it will fight against Trotskyism and right deviations and Washington.....How can such an action on the part of three Party members be characterized? At the same time it takes sometimes weeks to publish an appeal of the Party. It is true, the anarchy in our ranks has already partly been liquidated, but we will not be able to root it out too quickly. I do not think we should demand the discipline of the WCP in these countries and try to attain it by the same means. It is a different type of Party member and a different kind of educational methods must be used on them. As you see, there are lots of difficulties with the work here, but we are slowly progressing.

Please-consider the questions I dealt with and answer at once, if possible. I have written the letter with an interruption because I had a rather bad grippe in the meantime. And you must also excuse the unclear typing. Firstly, the working conditions are very difficult, and secondly, I am ~~just~~ as yet a bad "typist".

Comradely yours,

Emil
