

regularly. Everything has been limited to acknowledging receipt of them. The books promised, the newspapers and magazines are still awaited. There is a tendency to promise a great deal ~~but~~ do absolutely nothing; this is not only false in our revolutionary movement but also harms itself. In practice we can state that the Colonial Department first with Moreau at the head and later with Jhon Bell have not been able to carry out their duties for which I think they were possibly appointed, to ~~make~~ make connections with the CP of the Caribbean and of Latin America in general and to help the weaker movements become strong and to help them in order ~~to~~ to transform them into true revolutionary movements, but everything has been overlooked. Now not even the letters are answered.

This is at least the situation in Guatemala and El Salvador. This petty-bourgeois tendency of promising and not fulfilling must be ferociously liquidated, since up to ~~date~~ everything has become promises, even that relating to my personal situation which was going to be arranged it had been told me and that measures had been begun towards this; but it was never so.

With respect to the movement in Guatemala, I indicated to you the urgency of helping us economically for three or four months in order to construct something serious, nevertheless only receipt was acknowledged and up to date these letters were not studied and absolutely nothing was decided about the matter. This is the situation. Hence I once more point out the need of serious organs of the Caribbean, with all the confidence of the international organs and above all with all the ~~moral~~ moral and practical support for its works; otherwise we will see movements grow in an isolated way, when exactly what we need is to unify our activities in every sense. In this respect we are backward, since the Fish Commission organizes fascism in all the Latin American countries, sharpens the terror in the Caribbean countries, and we remain working in an isolated way. Without the least contact with what occurs in the world, since you must know that ~~much~~ much news does not reach Central America, ~~so~~ so that one is totally isolated from all fountain of news and from all serious relation with other brother parties. Outside of help and practical cooperation from our brother party of Mexico we have not had other help. Nevertheless this is poor, and it is certain that in the future it will be done more efficiently.

The constant need of giving graphic courses, and on all the immediate problems which are needed and which occur, is another one of our tasks. Develop them, intensify them and make them permanent is something that must be done in all the countries of Central America.

I should say that outside of the help from the Secretariat of the Caribbean MOPR, the CGP of the Mexican CP and Mexican YCL, we have had no ~~other~~ help; we have carried out work ~~under~~ under the most difficult and precarious conditions; if we had some funds, it is certain that the work would not only have been ~~intensified~~ intensified with relative facility, but also our organizations would have grown in number, since in Guatemala one cannot travel on the roads as in El Salvador, because often one is fined for more than a trip would cost and failure crowns such attempts. Therefore it is necessary that the representatives have help in this sense to develop their work under such conditions.

Also I should ~~state~~ state that I am completely against the establishment of the Central American Communist Party, owing principally to two fundamental reasons: uno, because it confounds us with the liberal petty-bourgeois ~~Centro-Americanists~~ Centro-Americanists and second, because we ~~would~~ would favor and stimulate the sharp provincialism which exists in these countries; third, because we need, not a Party for Central America, but a Secretariat of the Comintern for the Caribbean; fourth, because we would fall into chauvinism and ~~cooperativism~~ cooperativism, since the comrades in Central America are not able to lead their own national movements. What we need is a Secretariat of the Comintern for the Caribbean.

Finally I ought to say that the ~~CP~~ CP of Guatemala as well as that of El Salvador have influence among the masses, work in the mass organization (trade union and of the MOPR); what is lacking is a solid theoretical capacity and long experience; both are questions ~~depending~~ depending on daily work and that the Mexican CP lend elements to help us and to be able to work more seriously in this respect in order to achieve the creation of serious Communist movements in every country of Central America and of the Caribbean in general.
